# Garland Buggy Co.

Wholesale Manufacturers

# Carriages and Sleighs

Kalamazoo, Michigan

## General Description.

All of our Sleighs are of our own design and manufacture, built from the raw material in our own factories.

Our Lumber is air dried.

Our Gears are select hickory.

All Knees are bent for either single or double curve; NO SAWED CURVES.

All Braces are special rolled steel, tougher than Norway iron and much stiffer; secured to knees and benches with clips and Norway iron bolts and rivets. All hand work.

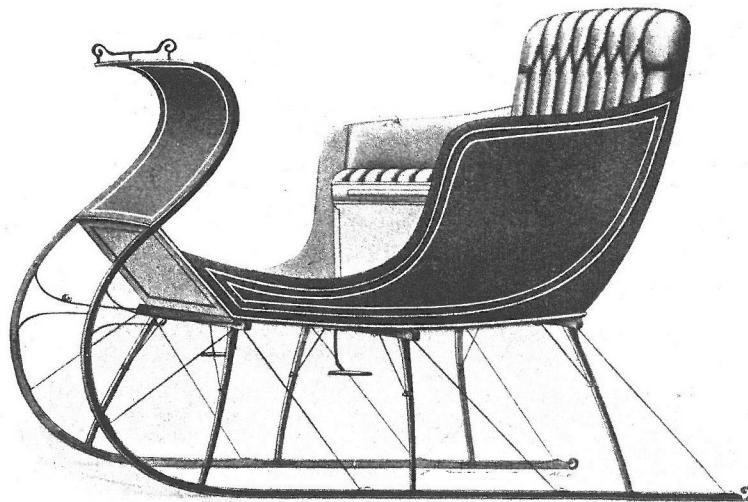

All bodies are made of full width panel stock, cut from the log; (no laminated wood glued, clamped, screwed and plugged to a select hardwood frame of thoroughly seasoned stock.

Painting is the old reliable wood and oil system, insuring the best finish and wearing qualities.

Our sleighs are trimmed with best grade cloths, padded with cotton fibre or curled hair, which gives a better finish and wearing qualities than any other material. Trimmings are removable wherever practical.

Some of our sleighs are quoted with shafts, some with poles and others with neither.

Make your orders plain, always observing the full description underneath each number.
